

Answer the following questions to test your knowledge on climate change.

1. Climate change is mainly due to ...
 - Wildfires (0)
 - **Human greenhouse gas emissions (100)**
 - Nothing (climate change does not exist). (0)

2. The greenhouse effect is a natural process. Without it, the average temperature on Earth would be ...
 - **-18°C (100)**
 - 0°C (0)
 - 15°C (0)

3. ... Is the main cause of CO₂ emissions.
 - Rice culture (0)
 - Construction (0)
 - **Transport (100)**

4. The source of energy that has the worst impact on climate is....
 - Gas (0)
 - Photovoltaics (0)
 - **Coal (100)**

5. At home, Consumes the most energy.
 - Cooking meals (0)
 - **Heating (100)**
 - Lighting (0)

6. ... What is the best way to reduce pollution as it relates to transport?
 - **Using electric, cars, buses (100)**
 - Creating new bus lines (0)
 - Build more roads (0)

7. Forests have an important role to play against climate change because ...
 - They are strolling zones (0)
 - **Trees produce oxygen (100)**
 - We need wood for construction (0)

8. The most efficient solution to reduce our emissions regarding food is to ...

- Eat local meat (0)
- **Eat less meat (100)**
- Intensify animal breeding (0)

9. Will climate keep changing during the 21st century?

- **Yes, temperature will keep increasing (100)**
- No, climate will become again what it used to be (0)
- Maybe, we have no precise data on the topic (0)

10. The Paris Agreement's (2015) goal is to limit global warming to well below...

- + 0,5°C (0)
- **+ 2°C (100)**
- + 5°C (0)

RESULTS

Between 0 and 400 points: You got many wrong answers, you still have a lot to learn on climate change, good luck!

Between 500 and 700 points: You are on the right track, carry on like that!

Between 800 and 1000 points: Great job! You already know a lot about climate change, you hold the key to climate action!
